

## **FOR SALE**

1970 I am selling this Unimog as a project as it needs work Its a 406 Om352 with the 6 speed with the working and crawler gears.

The machine has low hours and miles runs and shifts really well, tires are like new, also included is a Schmidt plow, The plow currently does not angle. The cab is a bit rusty but repairable, the frame is in very nice shape and has zero rust. The brakes need work they are the drum brake style. the unit has no bed only the tipper frame, with work this could be a nice unit, needs lots of little things, lights, seats, windshield wipers, door moldings shifter boots. the mog also has a rear centralizer to run a front mounted snow blower. I am asking \$9000
