

## 1988 U1750L Unimog with Snowblower

For sale is a 1988 U1750L Mercedes Benz Unimog (model series 437.112, SBU Heavy Series), equipped with a Schmidt Snowblower. It is equipped with a 170 hp, turbocharged diesel engine (engine model 366) that has been recently professionally rebuilt. It is highway drivable at speeds up to 55 mph. It has a clean Colorado title.

It has a manual transmission with three gear ranges, and 8 gears in each range, for a total of 24 gears. They are all synchromesh and all are available in forward and reverse. It can be operated in two- or four-wheel drive, and both front and rear differentials can be locked.

For operating implements (including the snowblower) there are four independent hydraulic circuits at the front and rear of the truck. There are live PTOs at the front and rear of the truck, with 540 and 1000 rpm speeds available.

The truck bed can be raised via hydraulic cylinder and tipped to the rear or either side.

Tires are Michelin XZL 365/80R20. There are two spares. Plenty of life remaining on all tires.

There is a removable counterweight in the bed of the truck, weighing 2450 lbs, consisting of 36 steel plates each weighing 68 lbs.

Included are the following:

New Interstate group 4DLT Heavy Duty Commercial battery

Professionally rebuilt short block (crank, camshaft, bearings, head resurfaced, valves reground, valve seals, pistons, rings)

New water pump

New clutch

New muffler

Rebuilt rear brake calipers

Cab and tipper bed repainted

New air system dryer

New exhaust brake foot valve

Chassis painted and rust preventative applied

Resealed tipper bed hydraulic cylinder

Rebuilt snowblower hydraulic cylinder

Factory service manual

Owner's Manual

120v block heater

10-ton hydraulic jack (made specifically for Unimogs)

Air hose for tire inflation using onboard compressed air system

Two spare tires

\$66,000
